

## *Family Gardening Day*

Burton End's first Family Gardening Day was a great success. Thank you to all the families, staff members and their families who turned up to help. We have moved the plants bought with the Pollination funding, to planters. This will allow them to continue to thrive until we are able to plant them in the flower beds by the outdoor classroom. Many hands make light work, so we were also able to tidy up the bushes and the paving slabs outside the year 5 classrooms. We are now waiting for the rain to soften the ground and will hold another Family Gardening Day next term when we will hopefully be able to move the plants to the specially dug flowerbeds.
